PRACTICAL ASSIGNMENT REPORT

PHP Practical Examination

Complete Output Documentation & Implementation Portfolio

Name: Chitroda Vignesh Pravinbhai

Roll No: 09

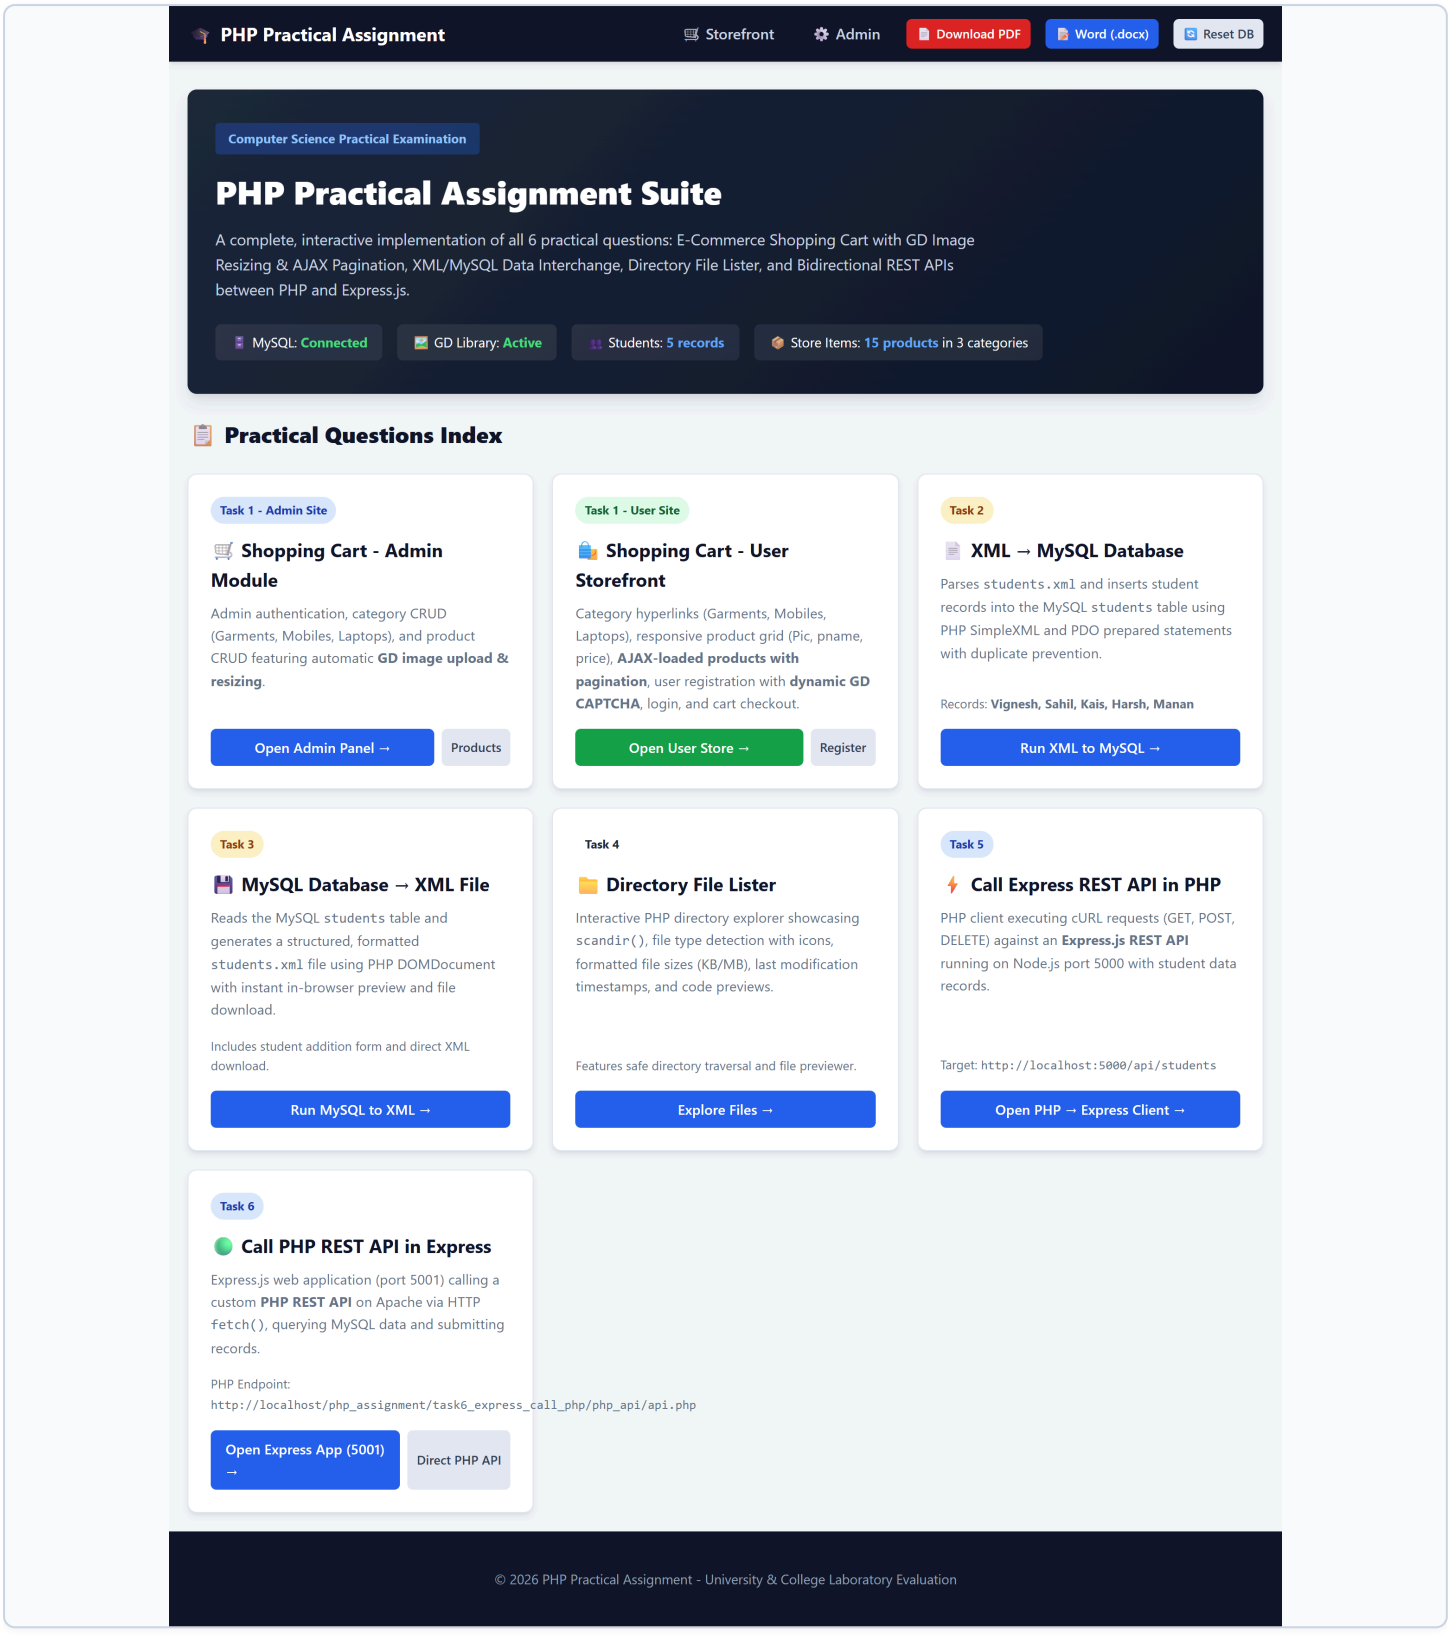

Semester: ICT-3

GENERAL OVERVIEW

1. Assignment Master Portal & Dashboard

The centralized landing portal showing real-time MySQL, Apache, and GD library status with direct links to all 6 practical assignments.

URL: `http://localhost/php_assignment/index.php`

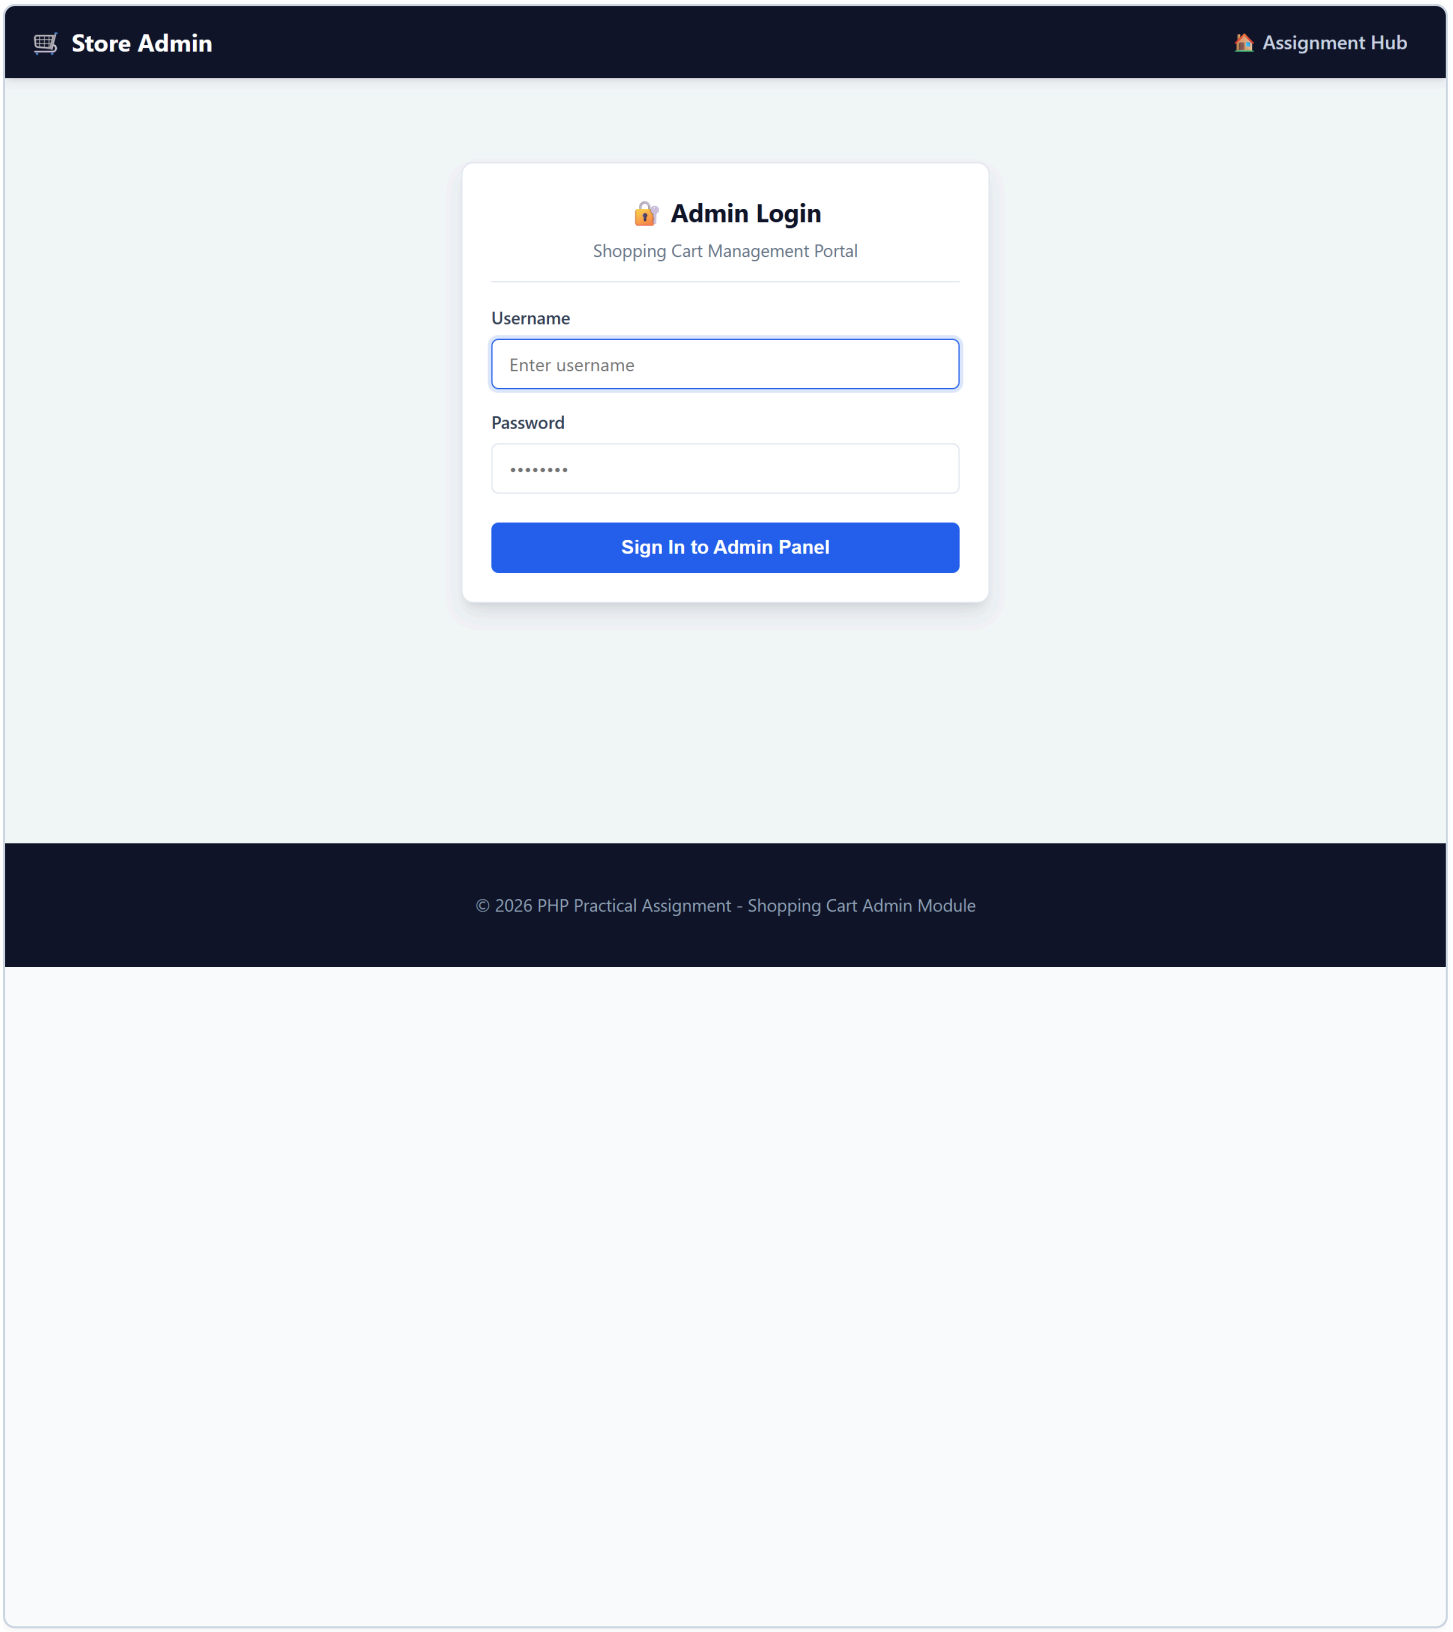

TASK 1: ADMIN SITE

2. Task 1: Shopping Cart - Admin Login Page

Secure admin authentication interface with bcrypt password verification.

URL: `http://localhost/php_assignment/shopping_cart/admin/login.php`

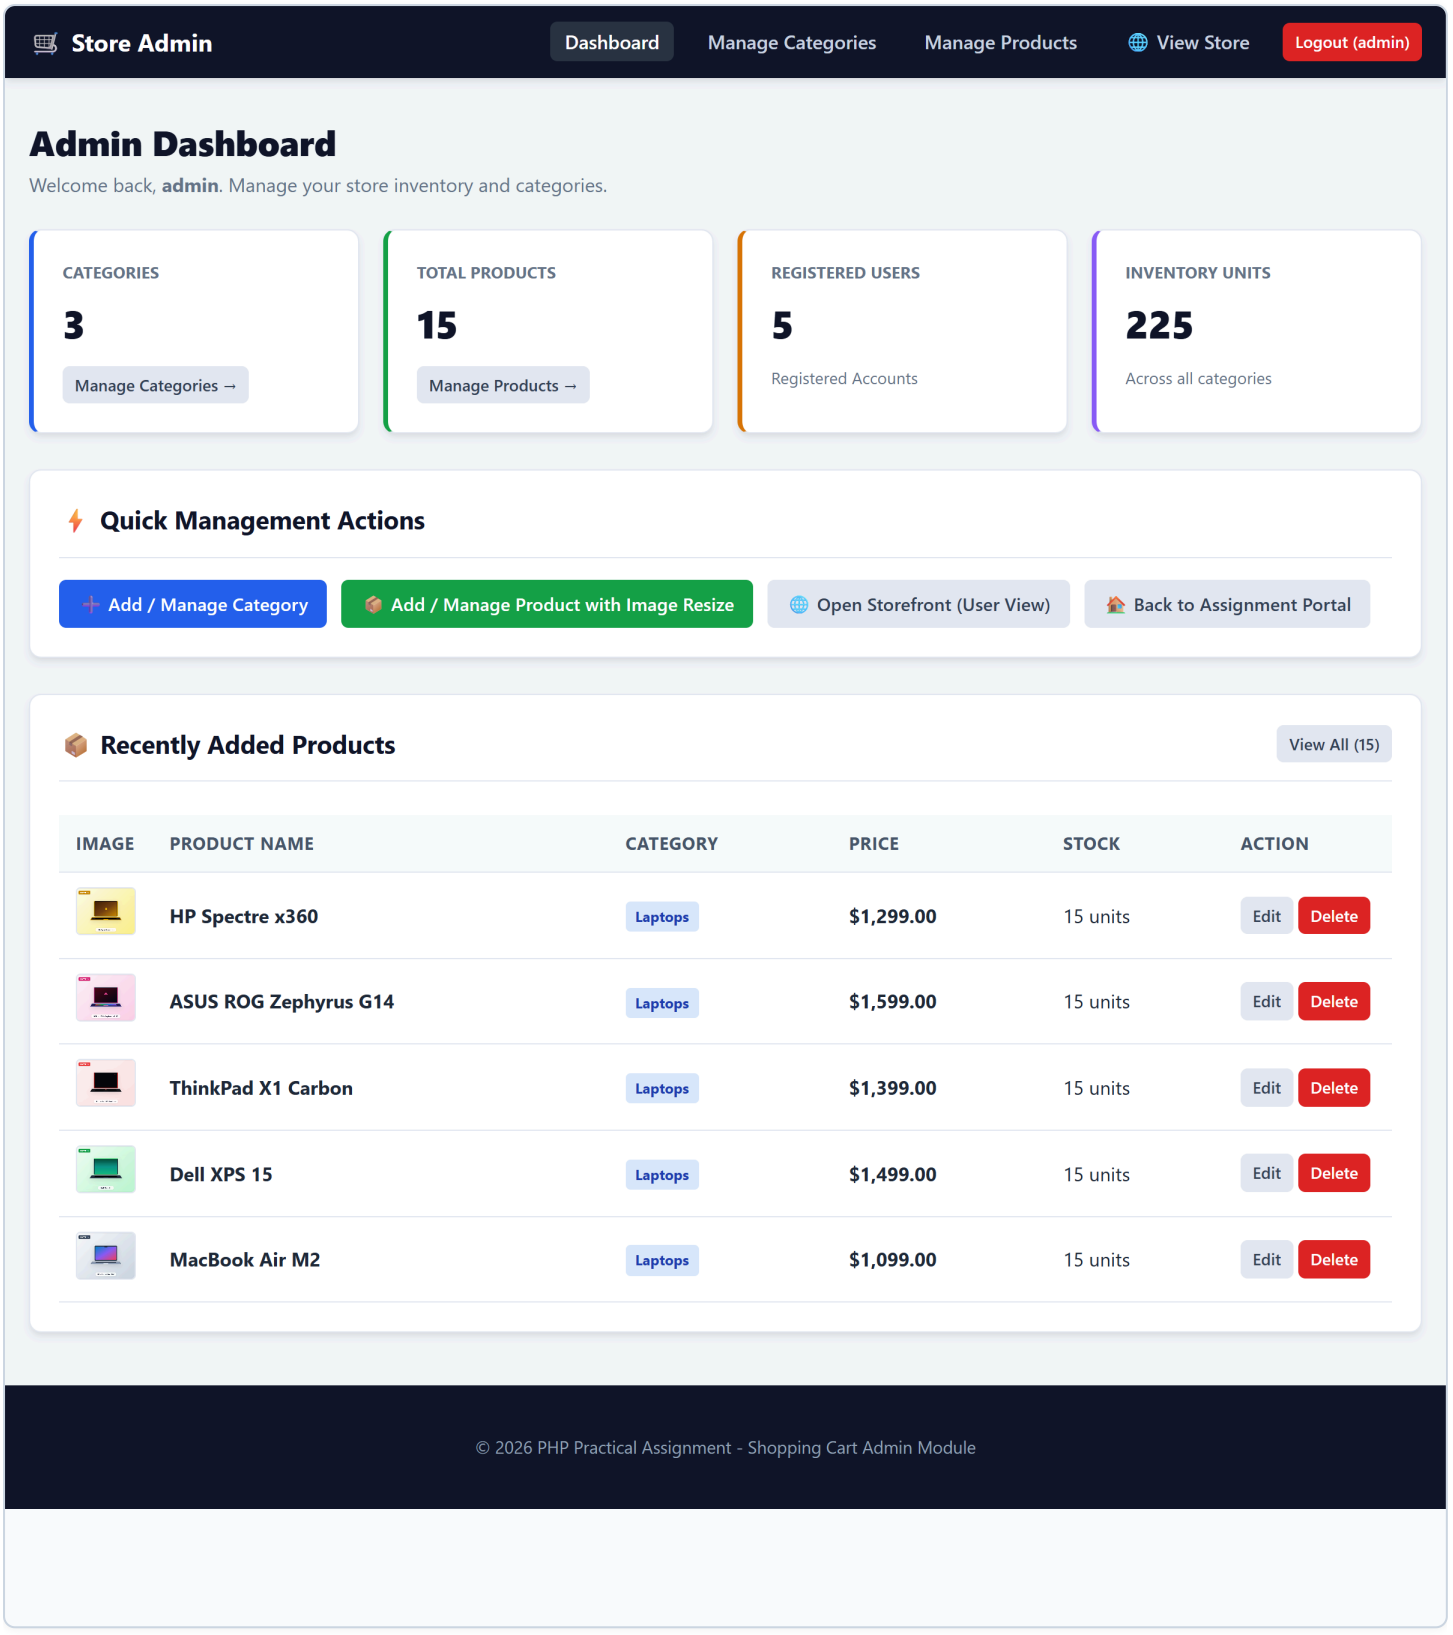

TASK 1: ADMIN SITE

3. Task 1: Shopping Cart - Admin Dashboard

Admin dashboard showing store metrics (Categories count, Total Products, Registered Users, Stock Units, and recent inventory).

URL: http://localhost/php_assignment/shopping_cart/admin/dashboard.php?token=report_token

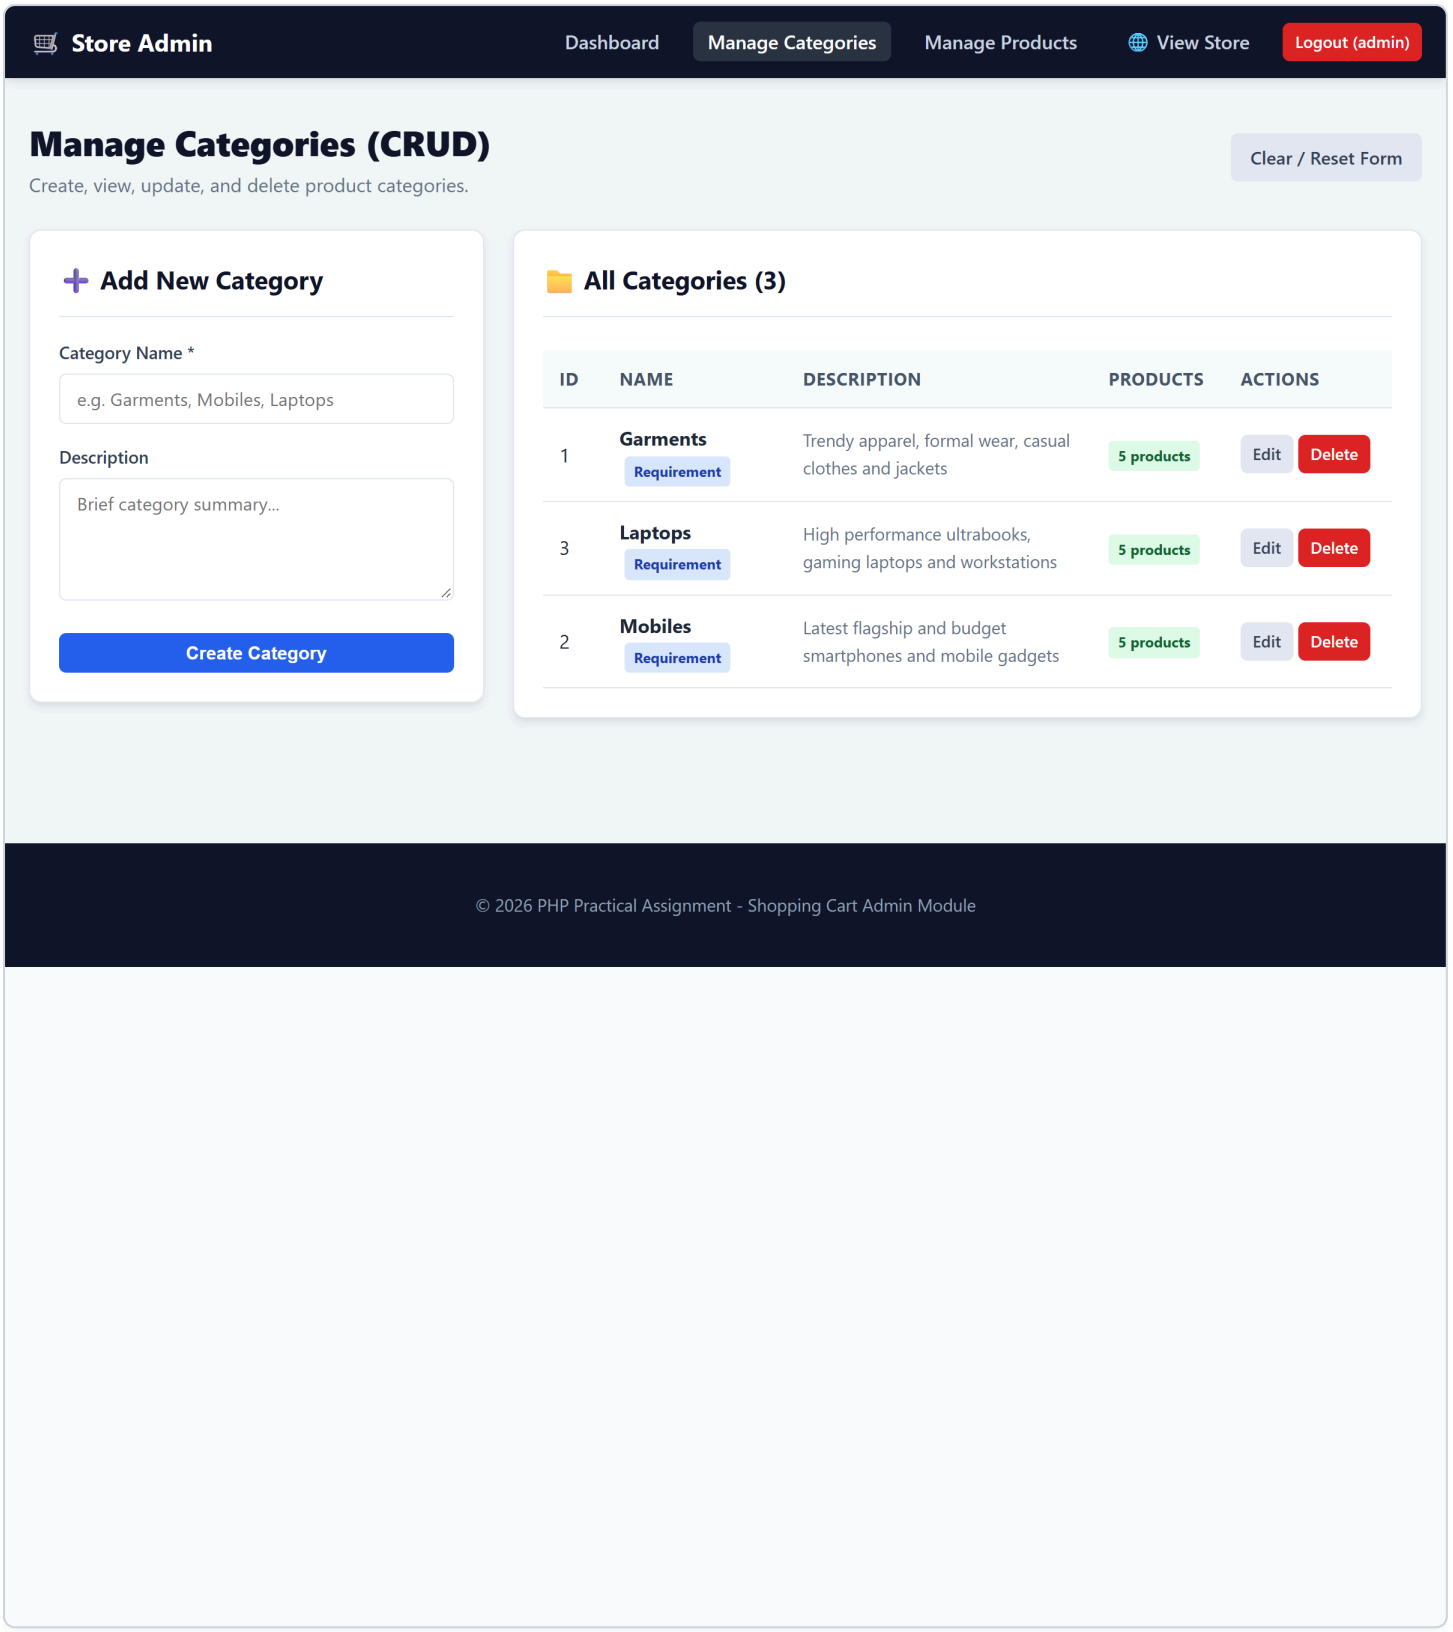

TASK 1: ADMIN SITE

4. Task 1: Shopping Cart - Manage Categories (CRUD)

Full CRUD management for categories (Add, Edit, Delete, List) configured with Garments, Mobiles, and Laptops.

URL: http://localhost/php_assignment/shopping_cart/admin/categories.php?token=report_token

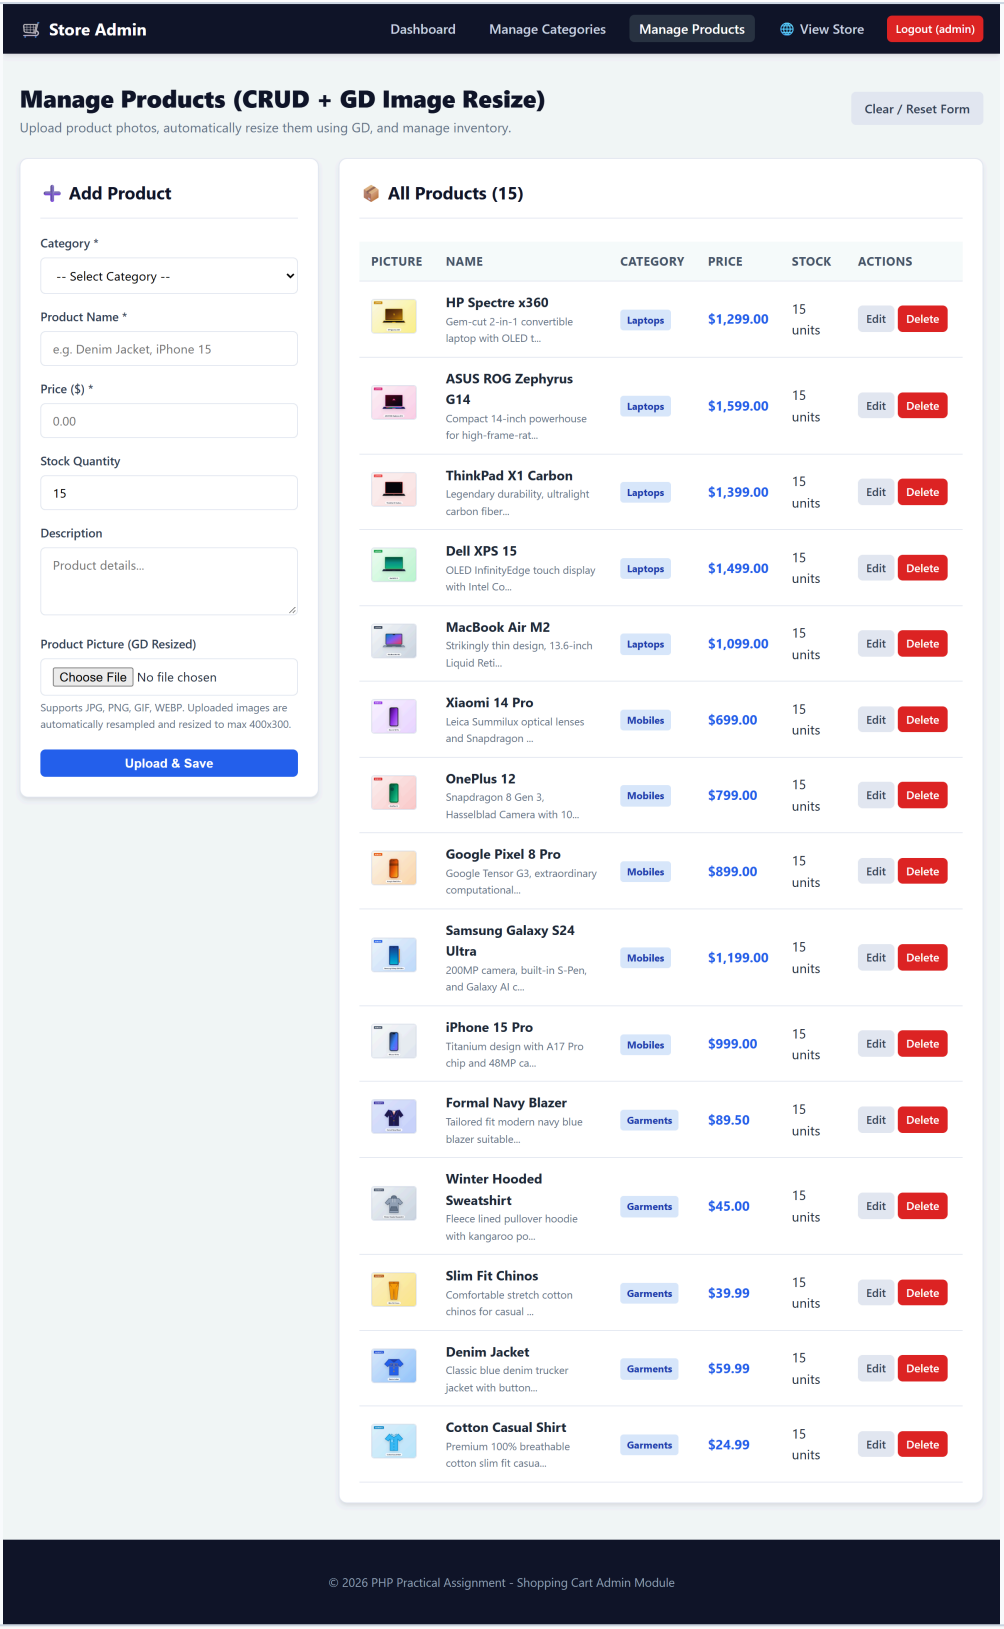

TASK 1: ADMIN SITE

5. Task 1: Shopping Cart - Manage Products (CRUD & GD Image Resize)

Product management with photo upload and automated GD image resizing (resampling to max 400x300, preserving aspect ratio).

URL: http://localhost/php_assignment/shopping_cart/admin/products.php?token=report_token

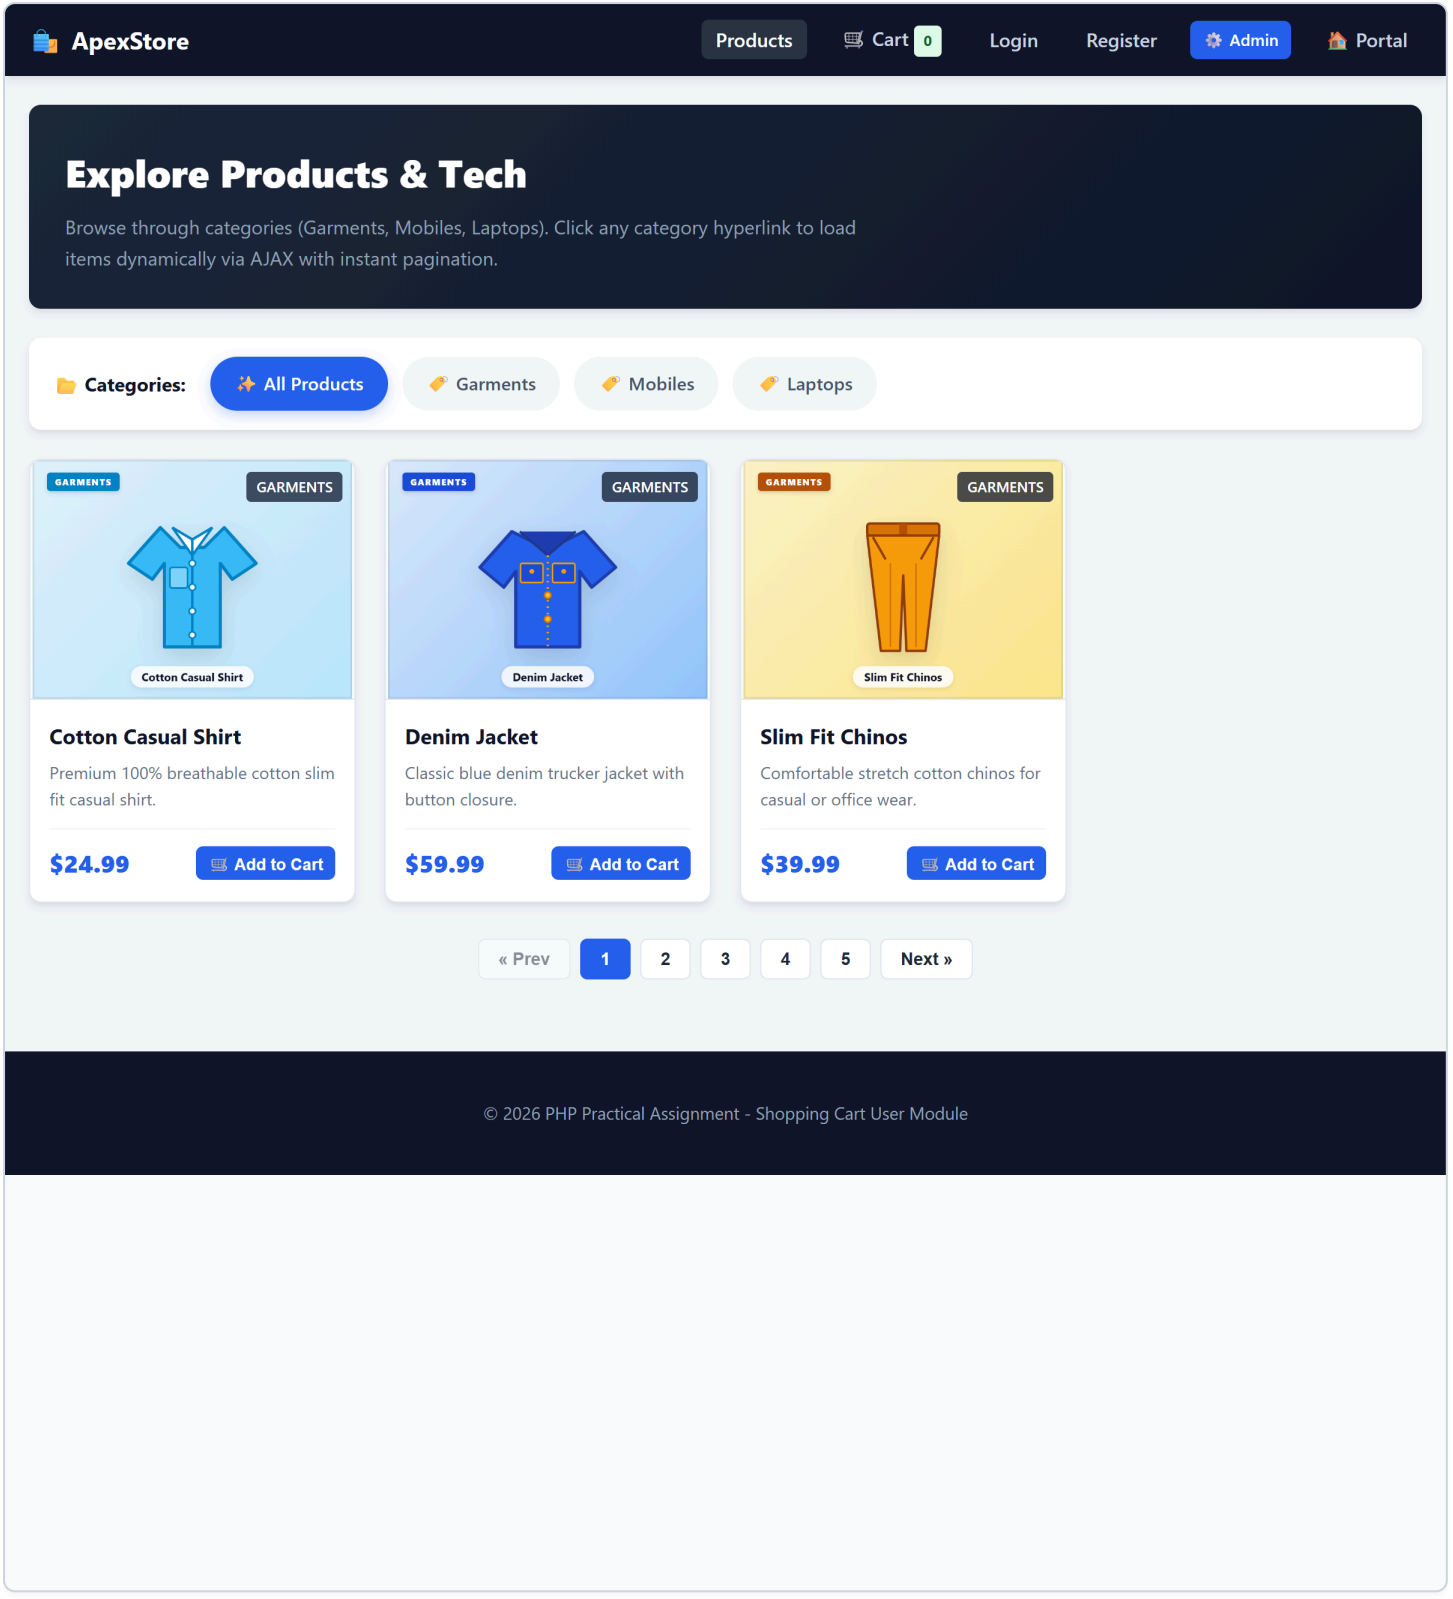

TASK 1: USER SITE

6. Task 1: Shopping Cart - User Storefront (All Products)

Customer storefront displaying category hyperlinks (Garments, Mobiles, Laptops), responsive product cards (Pic, pname, price), and AJAX pagination.

URL: `http://localhost/php_assignment/shopping_cart/user/index.php`

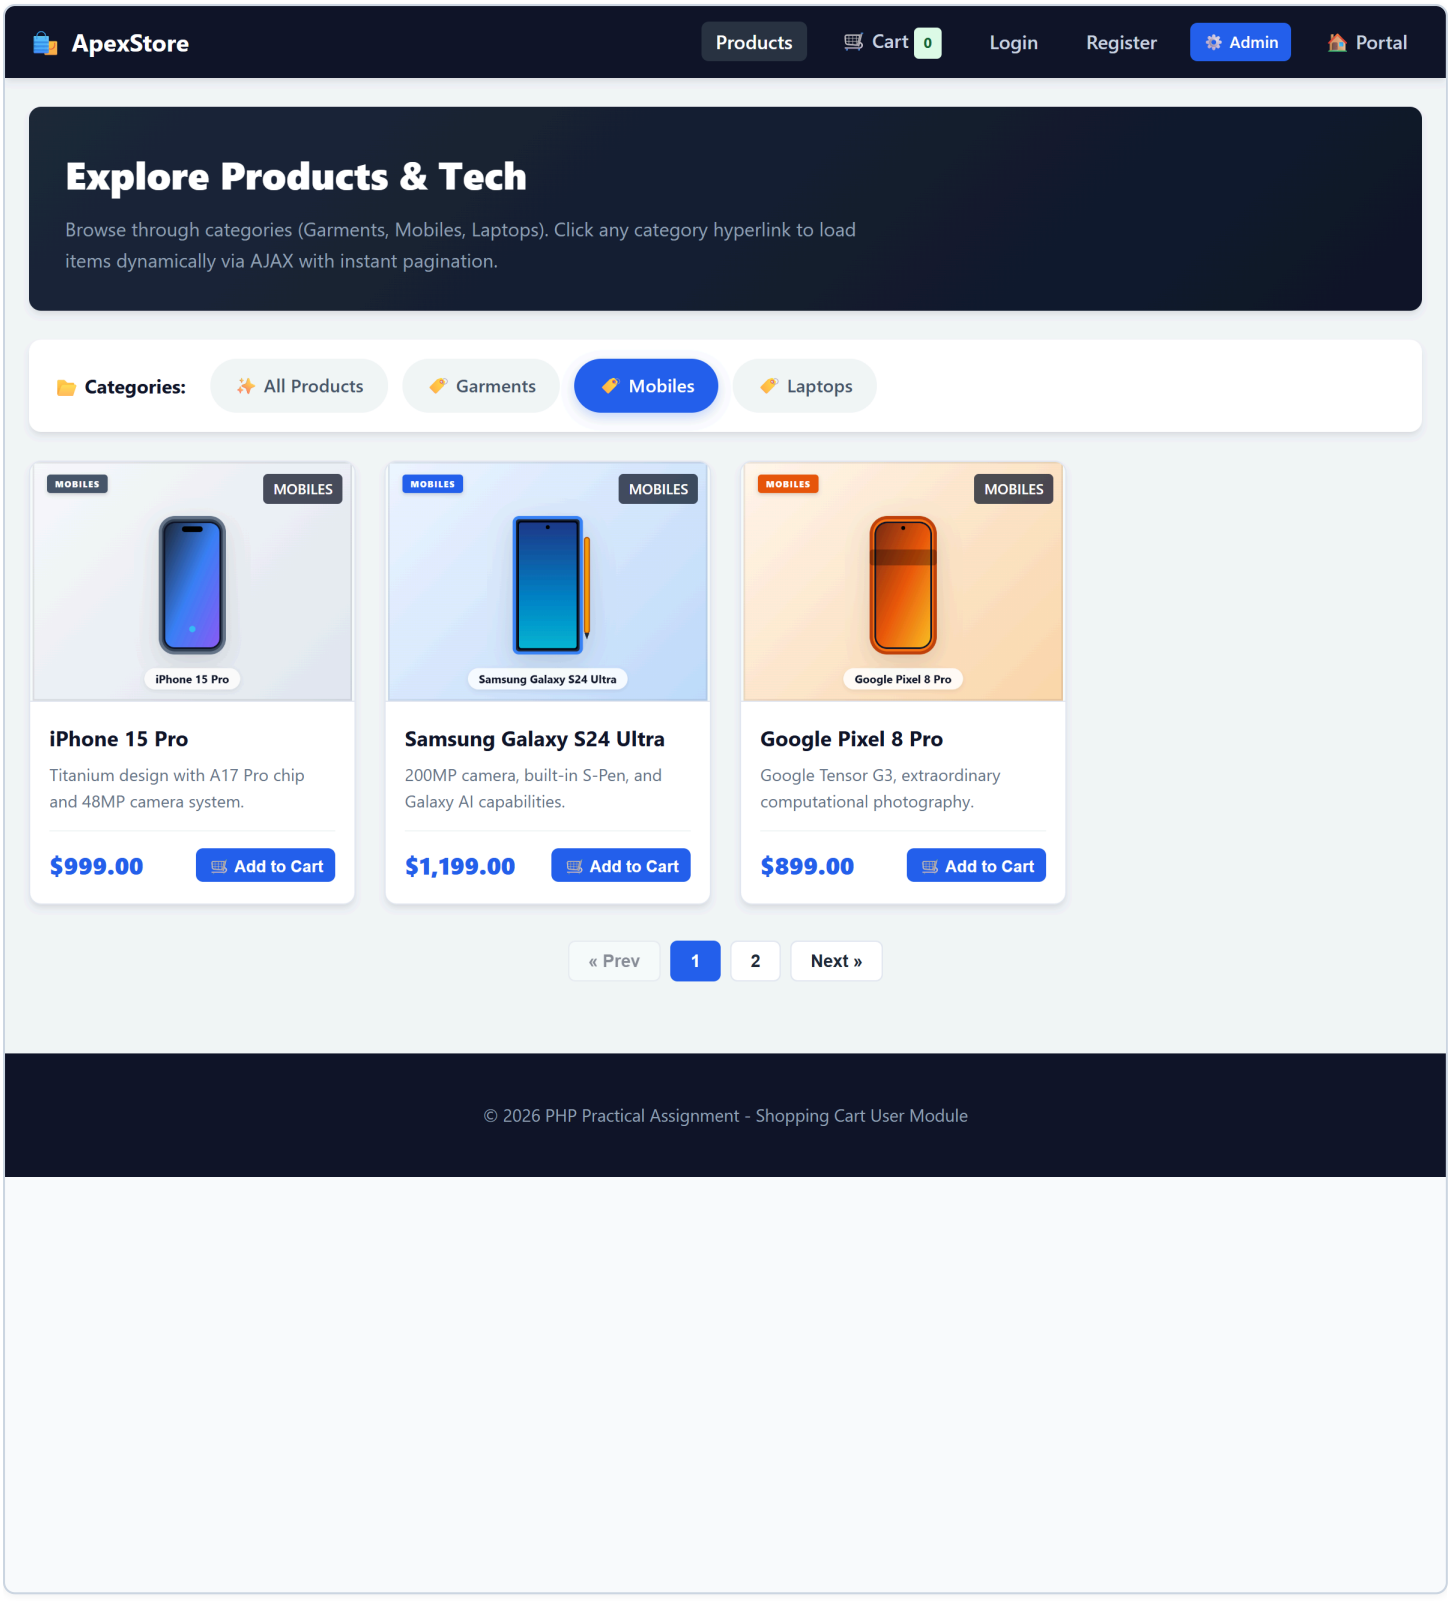

TASK 1: USER SITE

7. Task 1: Shopping Cart - AJAX Category Filter & Pagination

Demonstration of clicking a category hyperlink (Mobiles) triggering an asynchronous AJAX load with dynamic page buttons without page refresh.

URL: `http://localhost/php_assignment/shopping_cart/user/index.php`

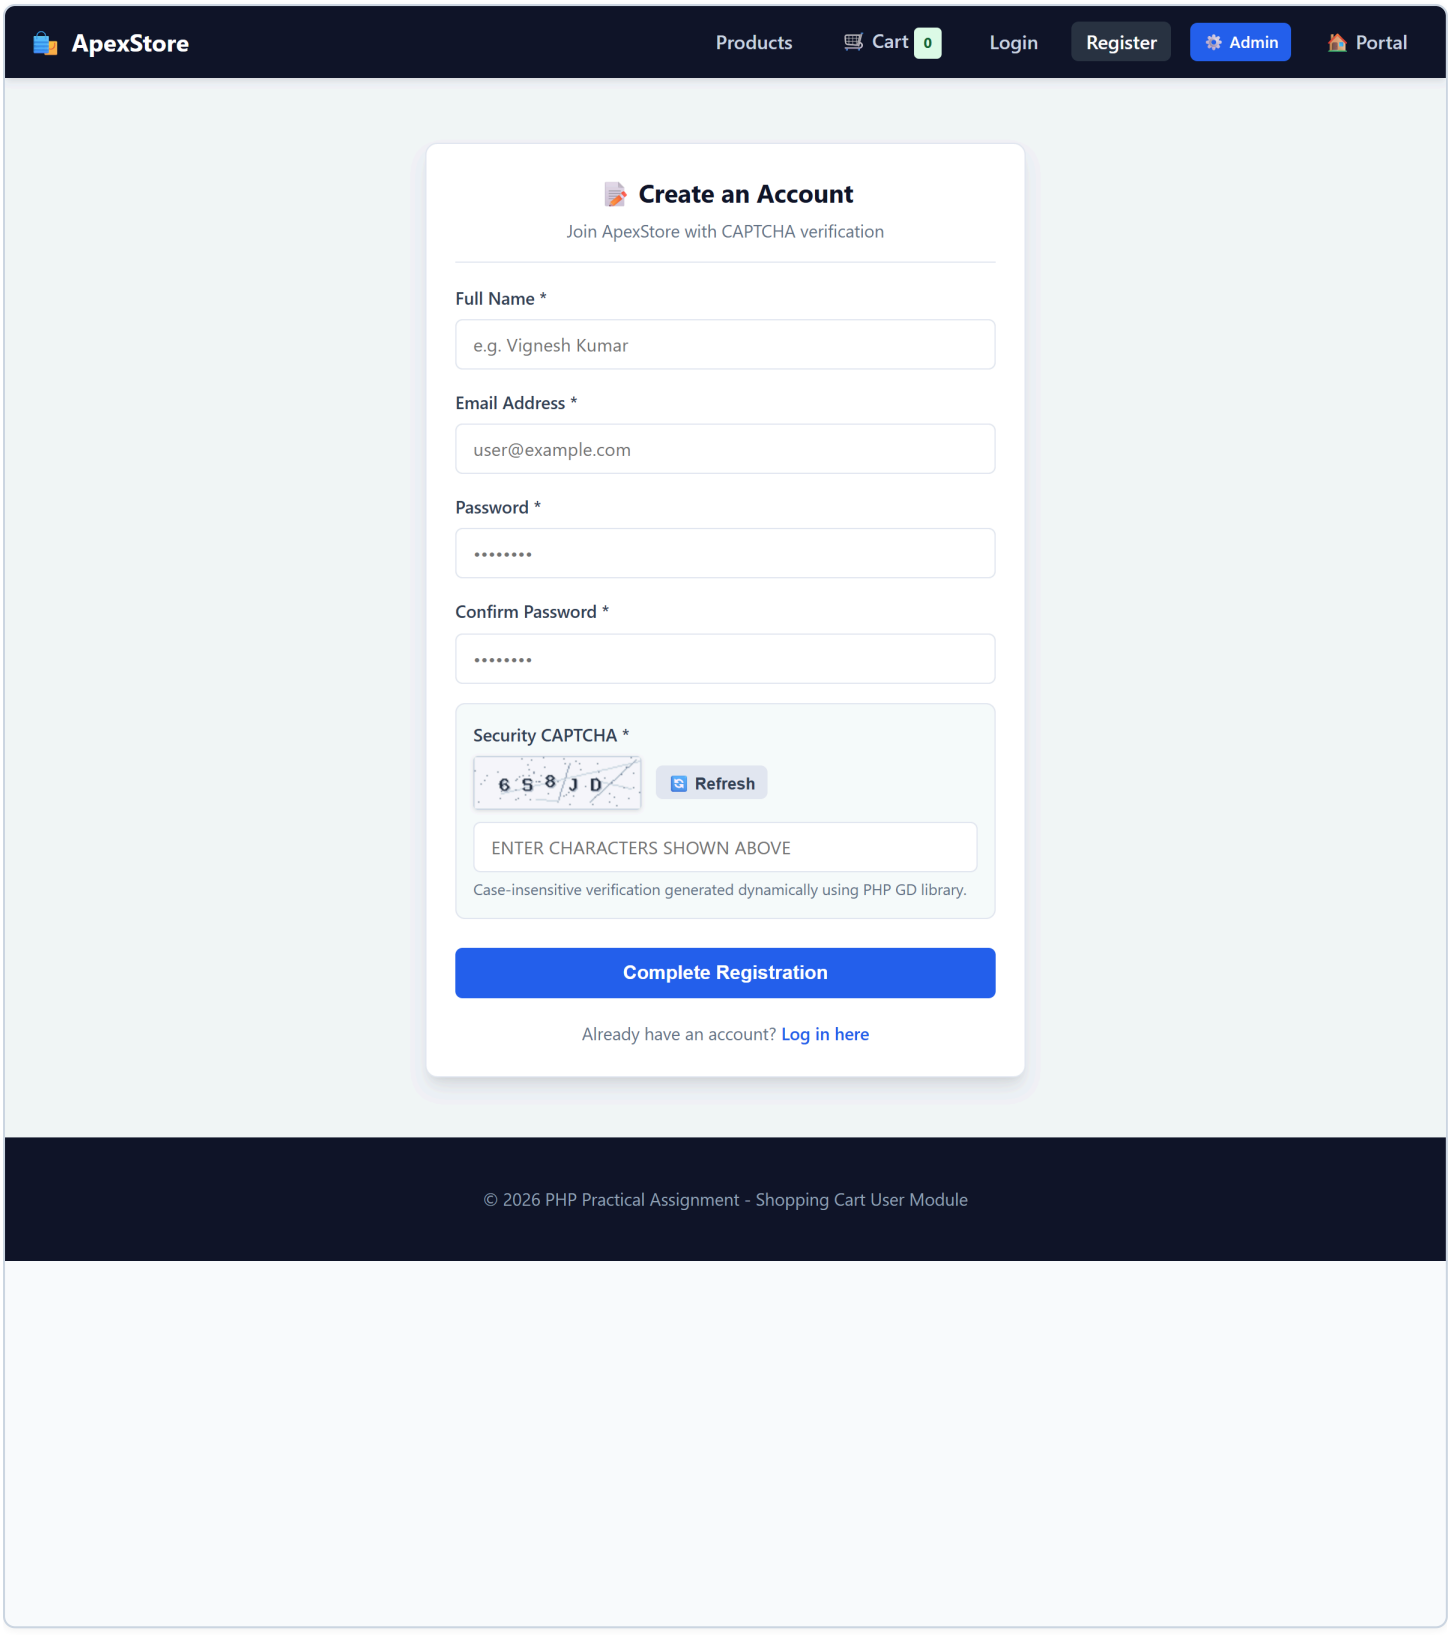

TASK 1: USER SITE

8. Task 1: Shopping Cart - User Registration with CAPTCHA

User signup form protected by a dynamic GD-generated security CAPTCHA with noise lines and characters.

URL: `http://localhost/php_assignment/shopping_cart/user/register.php`

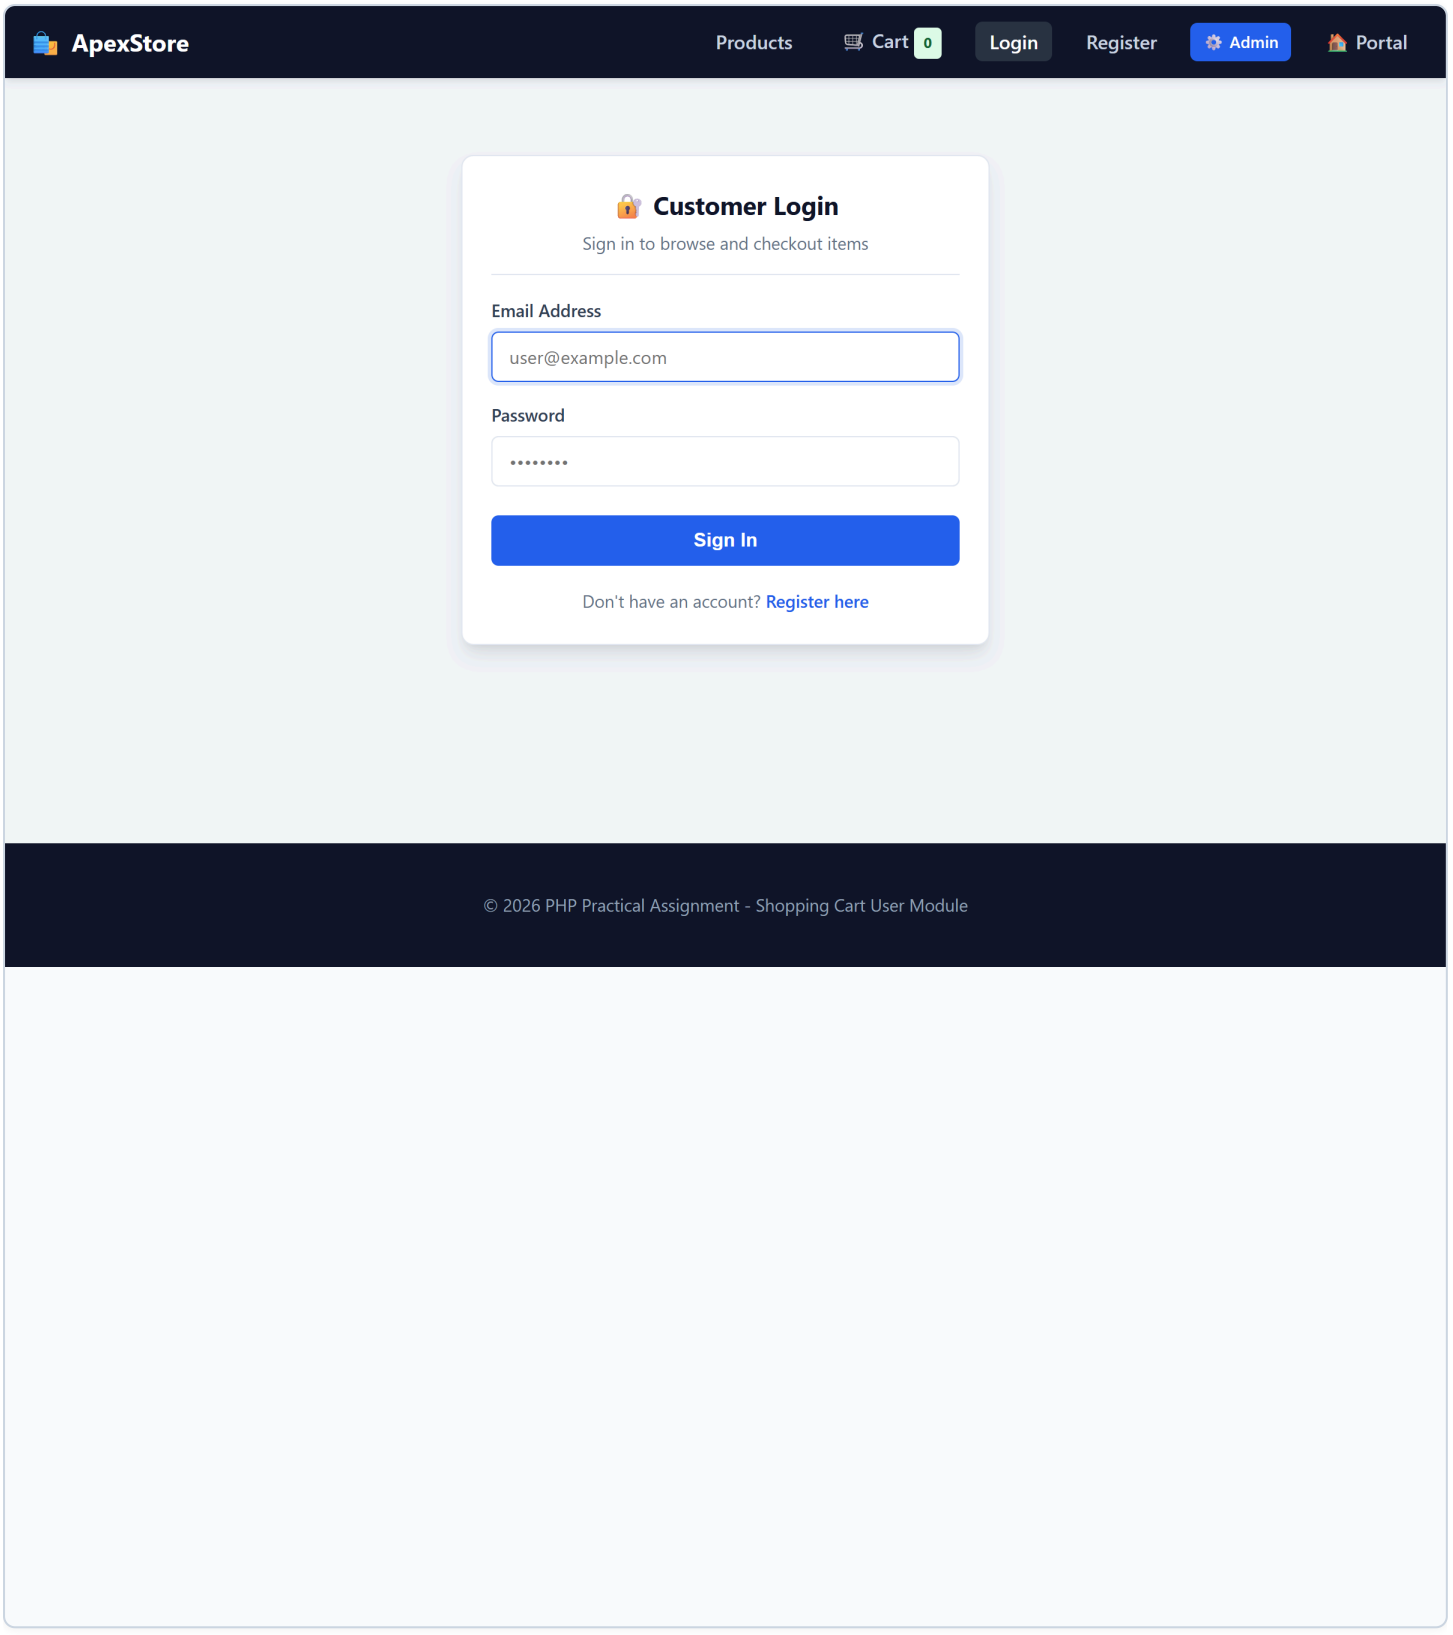

TASK 1: USER SITE

9. Task 1: Shopping Cart - User Login Page

Customer login interface with clean styling and secure authentication.

URL: `http://localhost/php_assignment/shopping_cart/user/login.php`

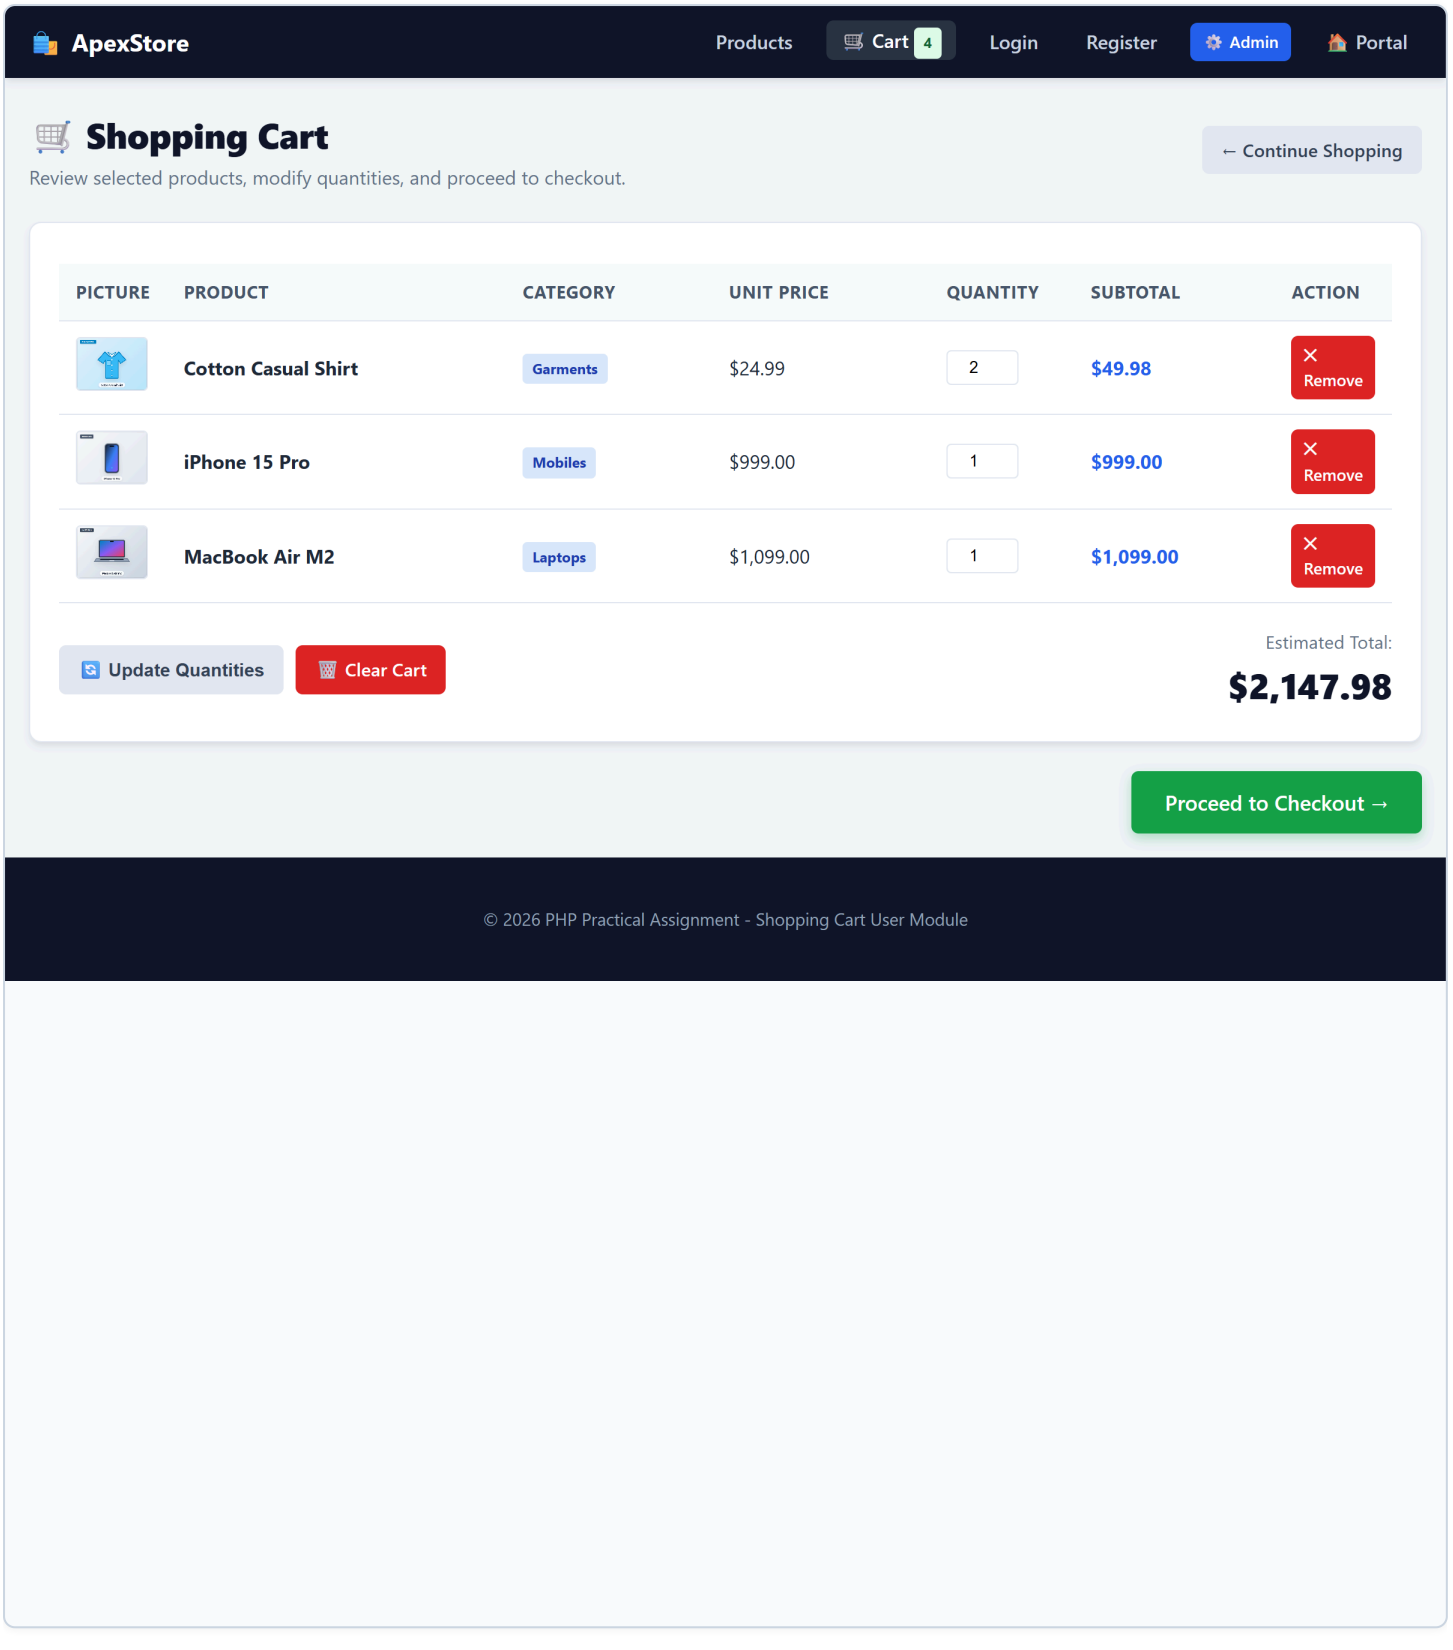

TASK 1: USER SITE

10. Task 1: Shopping Cart - Cart View & Quantity Management

Shopping cart page displaying item thumbnails, unit prices, quantity modification inputs, subtotals, and grand total.

URL: http://localhost/php_assignment/shopping_cart/user/cart.php?demo=1

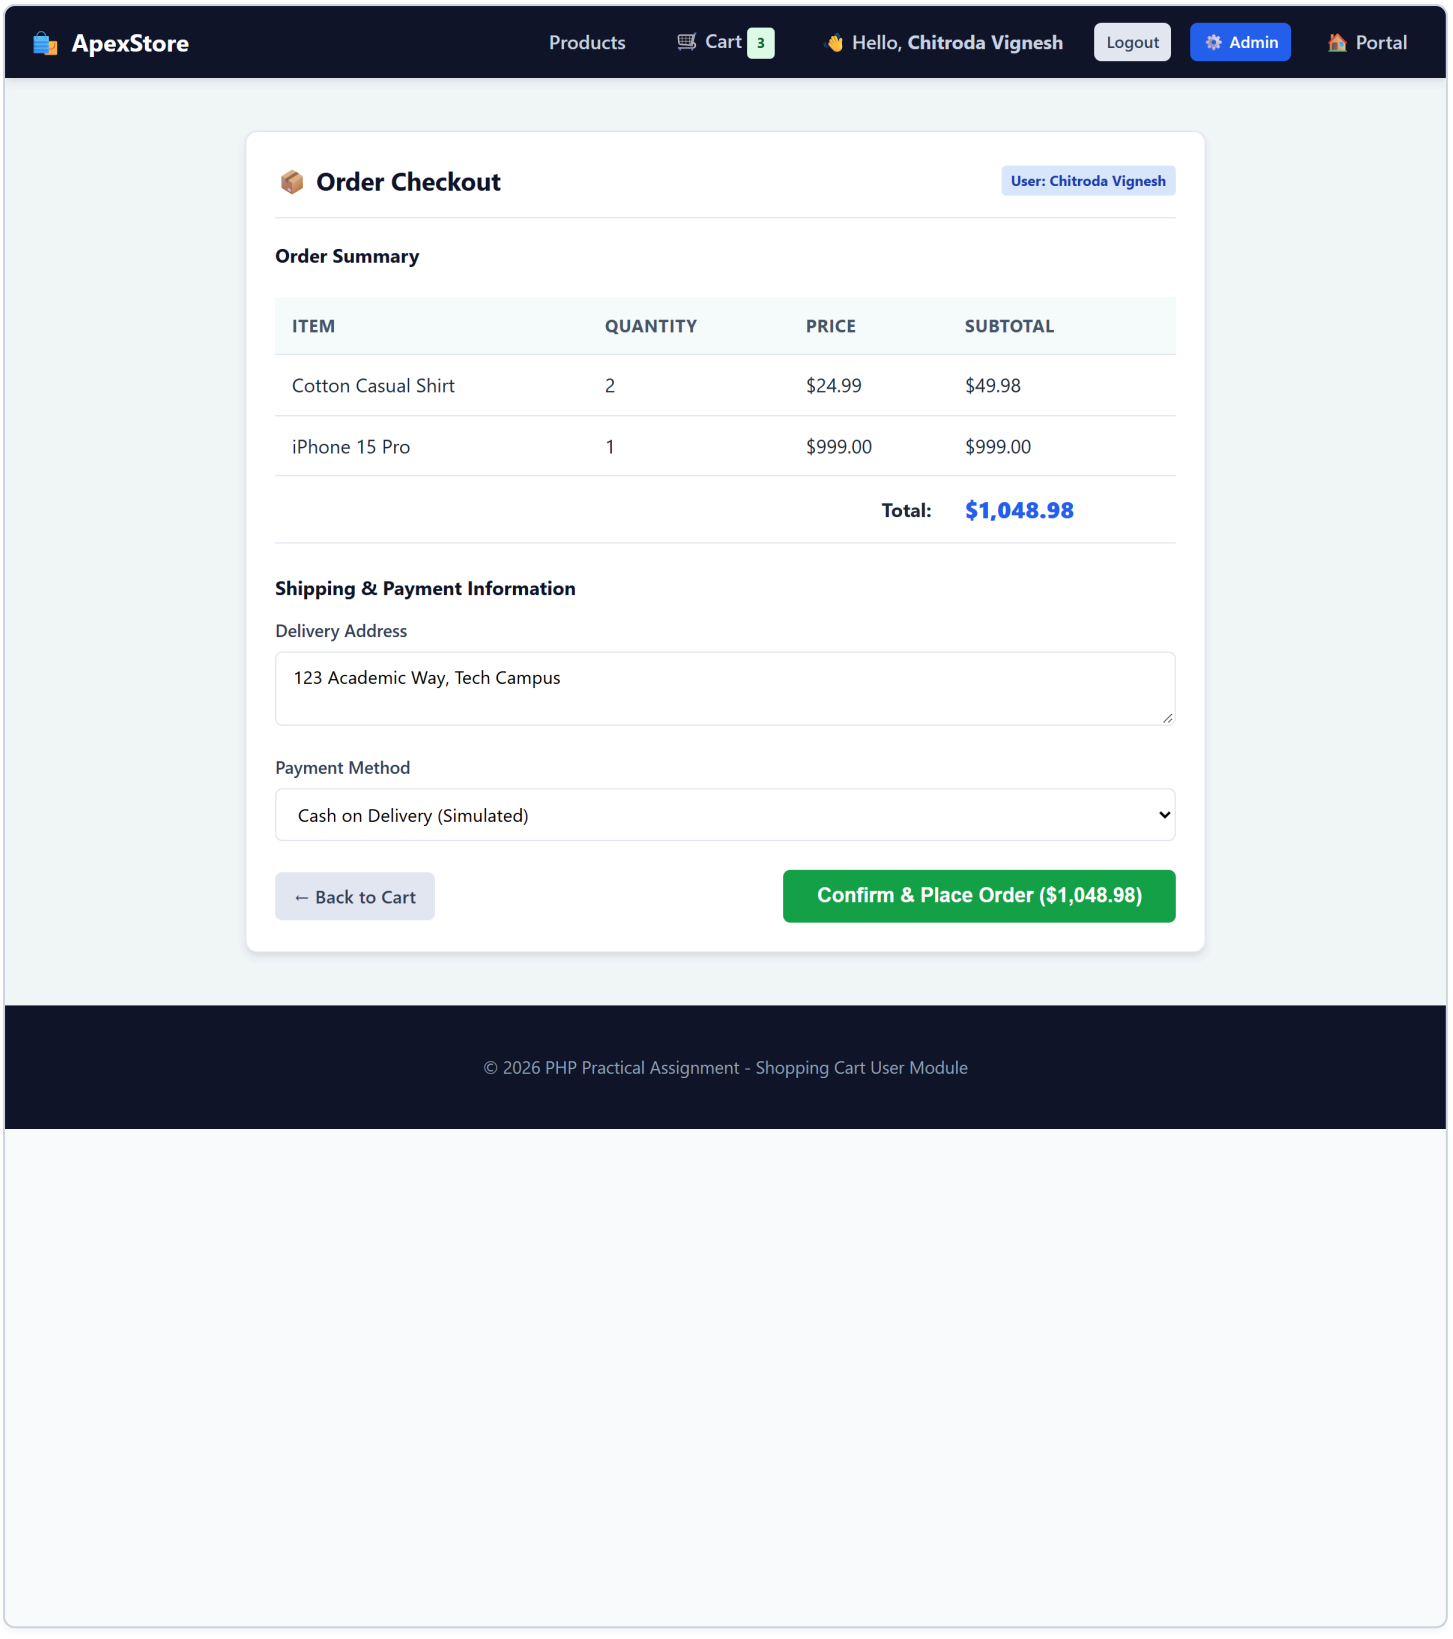

TASK 1: USER SITE

11. Task 1: Shopping Cart - Order Checkout & Summary

Checkout screen with order itemization, shipping address form, payment option selector, and order placement simulation.

URL: http://localhost/php_assignment/shopping_cart/user/checkout.php?demo=1

TASK 2: XML TO MYSQL

12. Task 2: Read Data from students.xml and Store in MySQL

Reads XML file containing students and inserts/upserts records into the MySQL students table.

URL: http://localhost/php_assignment/task2_xml_to_db/index.php

Task 2: XML → MySQL Assignment Portal Task 3: MySQL → XML →

Task 2: Read Data from XML and Store in MySQL

Reads structured student records from `students.xml` and stores them into the MySQL `students` table using PHP's SimpleXML and PDO prepared statements.

Import / Sync 'students.xml' to MySQL Target Table: `php_assignment_db.students` | Source File: `students.xml`

Source: students.xml XML Format

```
<?xml version="1.0" encoding="UTF-8"?>
<students>
    <student>
        <roll_no>101</roll_no>
        <name>Vignesh</name>
        <email>vignesh@example.com</email>
        <course>MCA</course>
        <marks>95</marks>
    </student>
    <student>
        <roll_no>102</roll_no>
        <name>Sahil</name>
        <email>sahil@example.com</email>
        <course>MCA</course>
        <marks>91</marks>
    </student>
    <student>
        <roll_no>103</roll_no>
```

Destination: MySQL students Table (5) Live MySQL Data

ROLL NO	NAME	EMAIL	COURSE	MARKS
101	Vignesh	vignesh@example.com	MCA	95
102	Sahil	sahil@example.com	MCA	91
103	Kais	kais@example.com	MCA	88
104	Harsh	harsh@example.com	MCA	93
105	Manan	manan@example.com	MCA	89

TASK 3: MYSQL TO XML

13. Task 3: Read Data from MySQL and Store in students.xml

Exports MySQL students table records into a structured, indented XML document using PHP DOMDocument with preview and download.

URL: http://localhost/php_assignment/task3_db_to_xml/index.php

Task 3: MySQL → XML | Assignment Portal | ← Task 2: XML → MySQL | Task 4: List Files →

Task 3: Read from MySQL and Store in XML

Fetches all records from the MySQL `students` table (including Vignesh, Sahil, Kais, Harsh, Manan) and creates a formatted `students.xml` document using PHP DOMDocument.

Export MySQL students → XML File

Download Generated students.xml (1104 bytes)

MySQL Database Records (5) — MySQL Table

ROLL	NAME	EMAIL	COURSE	MARKS
101	Vignesh Req	vignesh@example.com	MCA	95
102	Sahil Req	sahil@example.com	MCA	91
103	Kais Req	kais@example.com	MCA	88
104	Harsh Req	harsh@example.com	MCA	93
105	Manan Req	manan@example.com	MCA	89

Add Another Student

Roll No | Student Name | Email Address | MCA | 90 | Add

Generated XML Output — students_export.xml

```
<?xml version="1.0" encoding="UTF-8"?>
<students>
  <student>
    <roll_no>101</roll_no>
    <name>Vignesh</name>
    <email>vignesh@example.com</email>
    <course>MCA</course>
    <marks>95</marks>
    <created_at>2026-10-19 17:26:59</created_at>
  </student>
  <student>
    <roll_no>102</roll_no>
    <name>Sahil</name>
    <email>sahil@example.com</email>
    <course>MCA</course>
    <marks>91</marks>

TASK 4: FILE LISTER

14. Task 4: List Files in a Directory

Interactive PHP file system explorer showcasing directory traversal, file types with icons, formatted file sizes, timestamps, and preview.

URL: http://localhost/php_assignment/task4_list_files/index.php

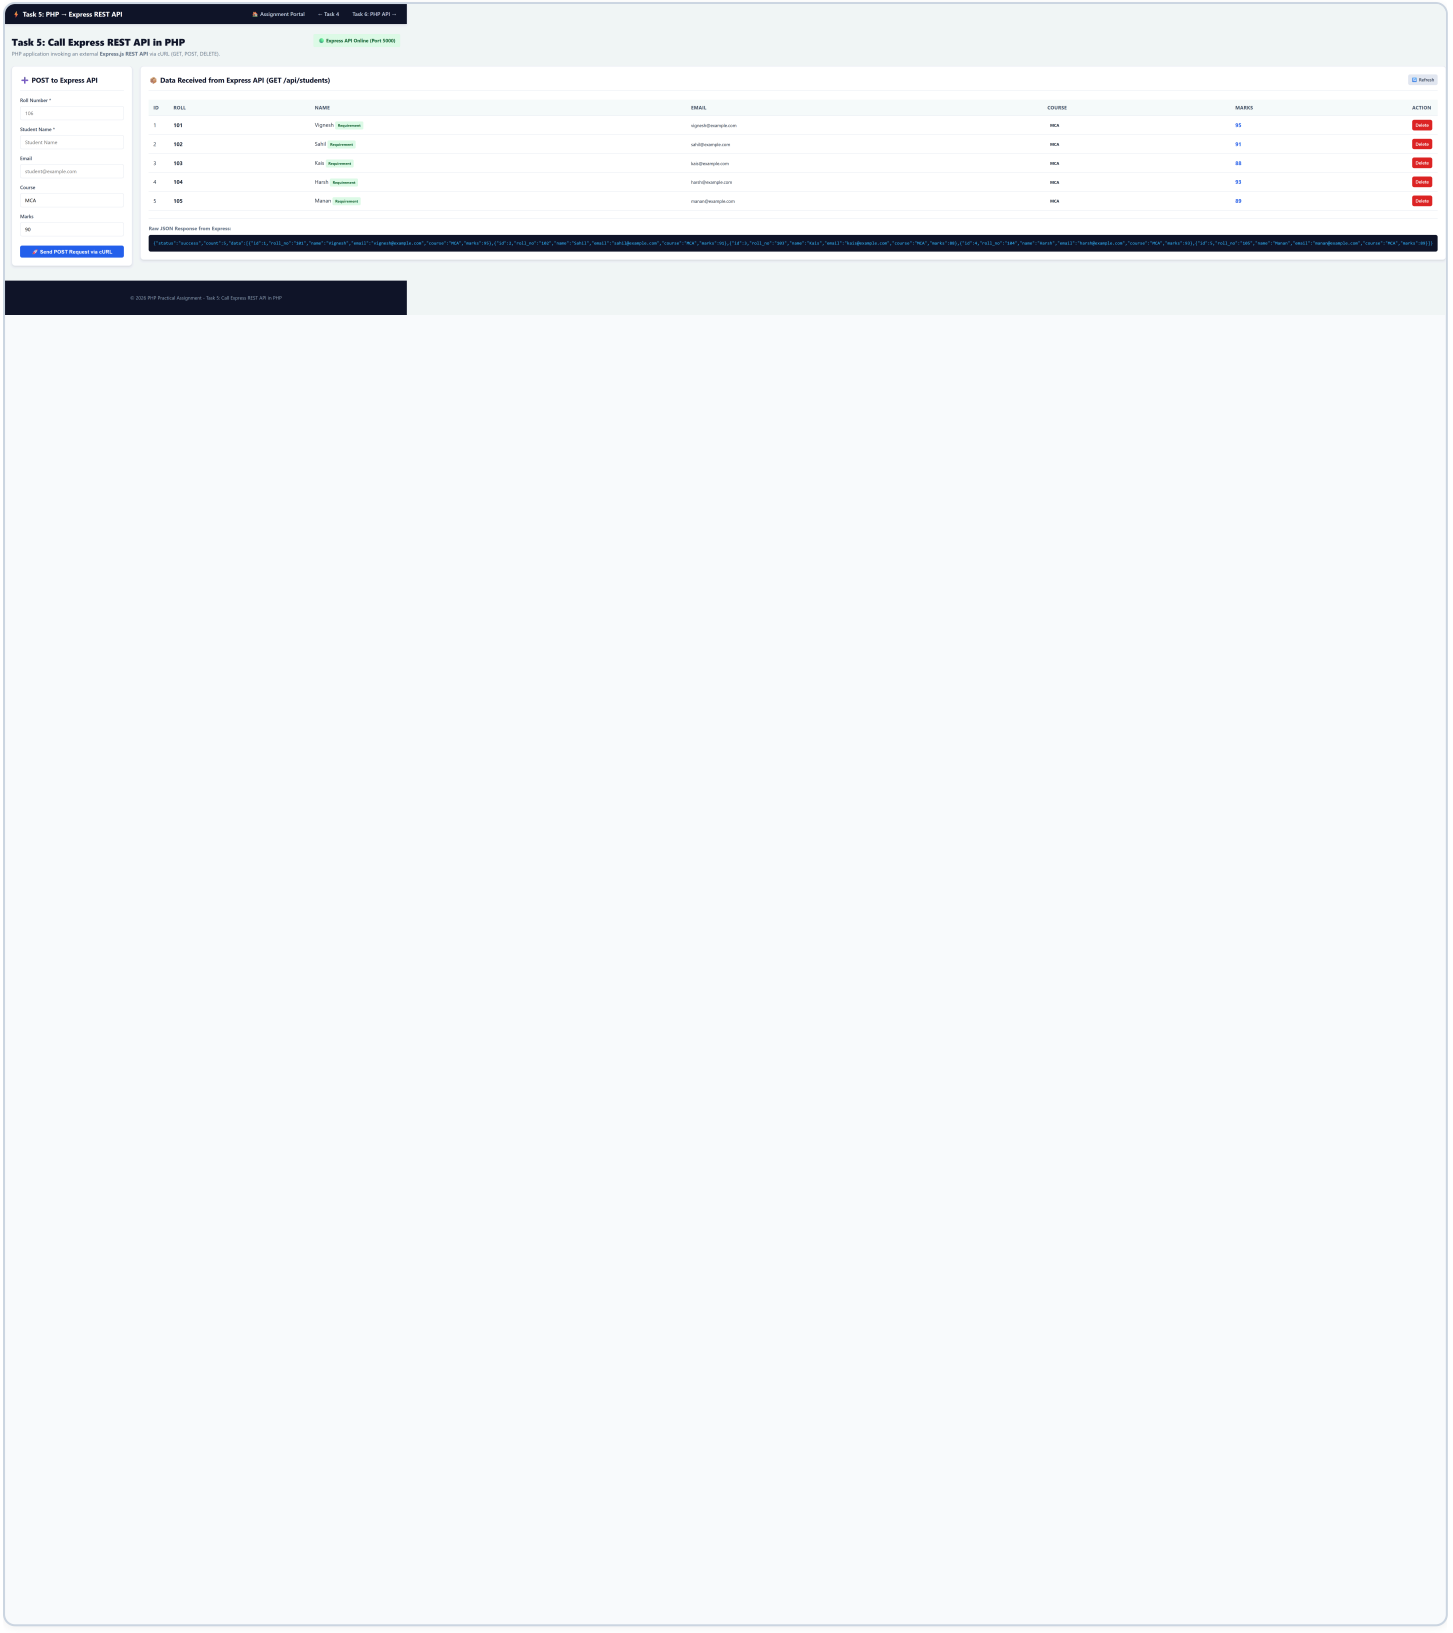

TASK 5: PHP -> EXPRESS API

15. Task 5: Call Express REST API in PHP

PHP application invoking an external Express.js REST API (Port 5000) using cURL to fetch, create, and display student records.

URL: `http://localhost/php_assignment/task5_php_call_express/index.php`

TASK 6: EXPRESS -> PHP API

16. Task 6: Call PHP REST API in Express

Express.js web application (Port 5001) calling a custom PHP REST API on Apache via fetch() and rendering live MySQL student records.

URL: `http://localhost:5001/`
